

# Minotaur Software Ltd.

*reliable software solutions since 1985*

## Chemical Manufacturing and Distribution

The Chemical industry has been an area of focus for Minotaur Software since 1985. Whether it is lot number tracking, variable unit of measure conversions, detailed production reporting or order fulfillment, Minotaur has the features to simplify the complex and unique requirements of the chemical industry. For chemical manufacturers and distributors, Minotaur can provide a powerful solution to improve your business efficiencies.

### Highlights

- Built-in unit conversions including specific gravity, drum to volume, etc.
- Multi level bill of materials
- Handles batch and co-product manufacturing
- Full lot and serial number control
- Barcode capabilities
- Quality Control product specification tracking
- FIFO depletion by flow meter quantity or BOM quantity

### Additional Features

- Unit Conversion is built-in allowing calculation factors to convert specified quantities including specific gravity calculations.
- Multi-level bill of materials allows you to track work in progress and perform cost and yield analysis at the various stages.
- Features to assist production of batches, followed by filling of varying container sizes.
- Tracks product specifications including identifying acceptable lots for those customers with identified product tolerances.
- Certificate of Analysis available for each shipment based on specifications of the lot being shipped.
- Transportation of Dangerous Goods documents, Material Safety Data Sheets and truck placards can be associated with applicable items.
- Item attribute system for tracking item characteristics. Eg. Flammable, corrosive, etc.
- Handles non-sellable Locations, where product can exist yet not be available for sale, such as QC area, lab locations, etc.
- Can track finished goods, work in process and raw materials by lot number, including trace reporting to assist with recalls.
- Barcode labels designed to your specifications. With our handheld module, scanners can be used to receive, ship, count, transfer and track product in your warehouse and at third party warehouses.
- Equipment tracking. Units such as dispensers, etc., can be rented or loaned to customers. System can inform users when return or service of the equipment is required using serial numbers.
- Up to eight decimals for small quantity production.
- Minotaur's experienced chemical industry Project Managers assist with implementation and ongoing support and they understand your industry.!

"Minotaur's customer service is second to none.

Their representatives worked closely with our management team throughout the system implementation, and their recommendations were a key factor in the success of the project."

*Christine Chartier, Controller,  
Forsythe Lubrication Associates.*
